C static code analysis

Unique rules to find Bugs, Vulnerabilities, Security Hotspots, and Code Smells in your C code

All rules **311**

Vulnerability **13**

Bug **74**

Security Hotspot **18**

Code Smell **206**

Quick Fix **14**

Tags

Search by name...

"memset" should not be used to delete sensitive data

Vulnerability

POSIX functions should not be called with arguments that trigger buffer overflows

Vulnerability

XML parsers should not be vulnerable to XXE attacks

Vulnerability

Function-like macros should not be invoked without all of their arguments

Bug

The address of an automatic object should not be assigned to another object that may persist after the first object has ceased to exist

Bug

"pthread_mutex_t" should be unlocked in the reverse order they were locked

Bug

"pthread_mutex_t" should be properly initialized and destroyed

Bug

"pthread_mutex_t" should not be consecutively locked or unlocked twice

Bug

Functions with "noreturn" attribute should not return

Bug

"memcpy" should only be called with pointers to trivially copyable types with no padding

Bug

"<stdio.h>" should not be used in production code

Analyze your code

Code Smell Critical based-on-misra lock-in

This includes file and I/O functions `fgetpos`, `fopen`, `ftell`, `gets`, `perror`, `remove`, `rename` and `ungetc`.

Streams and file I/O have a large number of unspecified, undefined and implementation-defined behaviors associated with them. It is assumed within MISRA C that they will not normally be needed in production code in embedded systems.

If any of the features of `stdio.h` need to be used in production code, then the issues associated with the features need to be understood.

Noncompliant Code Example

```
#include <stdio.h> /* Noncompliant */
```

See

- MISRA C:2004, 20.9 - The input/output library `<stdio.h>` shall not be used in production code.
- MISRA C++:2008, 27-0-1 - The stream input/output library `<cstdio>` shall not be used.
- MISRA C:2012, 21.6 - The Standard Library input/output functions shall not be used
